Subject: We might have found someone to help us with the Survey!

Dear John and Carole,

I hope you are both well. We are working hard to get your requests fulfilled asap. Thank you for your work on behalf of the town.

I spoke with Earl Sandford of Sandford Survey Engineers in New Boston. He has done a lot of the surveying for folks like the Ezells and my brother so he was familiar with the property. He seemed game to help.

However, he wanted to make sure we were not running down a rabbit hole with Scope of Work. He is very busy, as are the other surveyors who my sons have been trying to track down.

He was hesitant to reach out to you directly John as he has done many of these types of zoning projects. I am hoping that by making the correspondence open to the public that you can outline the scope of work so we can get started as soon as he is able. He does need to know the detail which he has to provide so he can give us some idea as to how soon he can come.

With respect and thanks for your help. Warmly, literally and figuratively, Boo
