- Class V
- Class VI
- Private

- Fatal
- Injury
- Property Damage Only
- Unknown
- Not Declared

Crash Inventory

Starting in 2002, the New Hampshire Department of Transportation Bureau of Planning and Community Assistance catalogues, analyzes, and distributes the crash data from reports submitted by municipal and state police. For each point depicted below (depicting a ten-year period from 2007 through 2016), the database contains information on the type, contributing factors, severity, vehicles involved, safety equipment used, traffic controls, and other information from the Department of Safety Motor Vehicle Accident Report. Note that not all crashes can be precisely located and mapped (approximately 167 out of 294 for this period).

Maps prepared by Southwest Region Planning Commission (SWRPC) are for planning purposes only. SWRPC uses data from multiple sources at various scales of accuracies. No warranties, expressed or implied, are provided for the data herein, its use, or its interpretation.
